### **DETAILED ACTION**

Receipt is acknowledged of amendments and remarks of 3/19/07.

Claim 12 is not here.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections - 35 USC § 112***

Claim 1, 10, 11 stand rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The rejection is maintained, attorney argues many compounds are described, and many plants are described-we find only a few compounds actually taught by applicant to demonstrate the method as claimed. These are limited to *C. japonica* treatment by probexadione compounds, as of page 39 and 46. Neither are there demonstrations of enzyme inhibition, which applicant presents as the basis for inhibiting pollinosis of *c. japonica*.

### ***Response to Arguments***

Applicant's arguments filed 3/19/07 have been fully considered but they are not persuasive

applicant's arguments are to the effect that numerous examples are provided of compounds. Plants and working examples the artisan would know to practice the invention without undue experimentation. Examiner finds there is a presumption of excessive experimentation, because those compounds of exemplary status as to inhibiting *c. japonica* pollinosis are quite fewer than the broad claim, even claim 11 recites. As to the claims 1-17 rejection, of beetles; examiner was in error. Please ignore the rejection. It is withdrawn.

Claims limited to the structure of Ala having enzymes inhibition, or direct pollinosis inhibition shown for the species of *c. japonica* or other species of coniferophyta demonstrated would overcome the 112 rejections, there are no further references examiner can find that teach this method.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

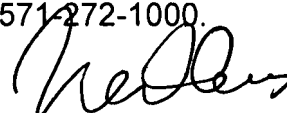

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
